

PRECISION BOAT WORKS

Precision Boat Works is now celebrating its 29th. year of supplying quality sailboats. Precision is one of the few small sailboat builders that utilize a world class yacht designer. Jim Taylor is a 6 time Boat Of The Year winning designer as well as a veteran of several America's Cup campaigns. All of Jim's Precision designs are comfortable, well mannered boats that sail! It is unfortunate that many boat designs are not based in naval architecture and deliver a boat that may look o.k. at a boat show, but they just do not deliver good sailing traits. There are few things more disappointing than a sailboat that does not sail well. Our commitment to quality, well-mannered, robust, value-engineered sailboats is the foundation on which our hard-earned reputation is based. Please visit our website or any of our dealers to learn more about these exceptional sailboats.
